Suvendu Sekhar Lenka

Contact: +91-9769934539, Email: suvendulenka87@gmail.com

SUMMARY:

Accomplished Senior Tech Data Specialist with extensive 15 Years of experience in data warehousing, ETL development, and business intelligence. Proven track record at LTIMINDTREE Limited, IBM India Limited, TCS, Capgemini and other leading firms. Expertise in SAS ETL, SAS DI, SQL, Snowflake Data Warehouse, and advanced analytics. Adept at data integration, data quality management, and performance tuning. Strong background in cloud computing, statistical modelling, and data Governance. Career goal includes leveraging technical skills to drive innovative solutions in data management and analytics.

PROFESSSIONAL EXPERTISE:

- Experience in building product ionised data ingestion and processing pipelines and experience in designing and implementing production grade data warehousing solutions on large scale data technologies.
- Strong experience in migrating other databases to Snowflake & AWS redshift. Work with domain experts, engineers, and other data scientists to develop, implement, and improve upon existing systems.
- Professional experience in Customer Support for ongoing SAS projects and optimize & automate the existing environment load by 20% to save revenue.
- Participates in the development improvement and maintenance of snowflake database application.
- Skilled in designing, developing, and deploying analytical workflows using SAS Viya for enterprise-scale data processing and reporting.
- Proficient in SAS Data Studio for data cleaning, wrangling, and integration across multiple structured and unstructured data sources.
- Strong knowledge of SAS Viya CAS architecture, distributed computing, and performance tuning for in-memory.
- Experienced in creating interactive dashboards and reports with SAS Visual Analytics & Power BI for insights.

WORK EXPERIENCE:

- Working as Senior Tech Specialist in LTIMINDTREE Limited from June'22 to till **Date**.
- Worked as Senior Advisory Lead in IBM India Limited from Mar'21 till to June'22.
- Worked as a Lead SAS Tech Lead in Yash Technology Services from Apr'20 to Mar'21.
- Worked as a Senior SAS Consultant in Capgemini Technology Services from Feb'16 to Apr'20.
- Worked as a Senior SAS Consultant in Tata Consulting Services Pvt. Ltd. from Feb'14 to Feb'16.
- Worked as a SAS Analyst in Quattro Analytics Pvt. Ltd. from Aug'12 to Dec'12.
- Worked as a Software Engineer in Serco Global Services Pvt. Ltd. from Feb'10 to Aug'12.

SKILL SET:

SAS 9.x & SAS VIYA	Data Quality Management & Performance Tuning
Data Integration, Modelling & Ingestion	Data Migration & Data Conversion
Data Warehousing using ETL & ELT	Unix, Mainframe and Windows Environment
SAS BASE, Advance/SMC	SAS Studio, SAS EG/ LSF, WINSCP
Snowflake Data Warehouse	ORACLE/DB2, SQL Server, SYBASE
Data Quality & Data Profiling	Data Governance & Data Support

CERTIFICATIONS:

- SAS Certified Base Programmer for SAS 9 – 2012
- SAS Certified Advanced Programmer for SAS 9 – 2014
- SAS Certified BI Content Developer for SAS 9 – 2015
- SAS Certified Data Integration Developer for SAS 9 – 2016
- Snowflake SnowPro Core Certifications Exam - 2025

EDUCATION:

- Bachelor's Computer Science from Utkal University, Odisha in 2007.
- Senior Schooling (10+2) in Science from CHSE Board, Odisha in 2004
- Schooling or 10th Board in Science from BSE Board, Odisha in 2002

CAREER HIGHLIGHTS:

- Owned Trailblazer Squad award (Client Impact) by LTIMINDTREE for Year 2025.
- Highly impacted Customer Feedback received from one of LTIM Client for supporting them on migrating SAS codes from their legacy DB to AWS redshift in Year 2024.
- Received Client Appreciation with LTIM higher Management Appreciation for completing SAS to Snowflake conversion before the deadline with 100% quality in Year 2023.
- Received High Performer Award by Capgemini Technology Service for Year 2017.
- Awarded as Star Performer by Tata Consultancy Services for Year 2015.

PROJECT - DATA WAREHOUSE: ROLE - SAS VIYA CONSULTANT: ORGANIZATION : LTIMINDTREE (DATA & AI):

- Designed, developed, and executed analytics workflows using SAS Viya on cloud and on-prem environments.
- Utilised SAS Visual Analytics (VA) and SAS Visual Statistics (VS) for interactive dashboards and statistical modelling.
- Leveraged CAS (Cloud Analytic Services) for distributed in-memory data processing and analysis.
- Migrated legacy SAS 9.x programs and reports to SAS Viya environment.
- Created dynamic dashboards and visual reports using SAS Visual Analytics for real-time business insights.
- Designed and managed data pipelines in SAS Data Management and SAS Environment Manager.
- Handled data ingestion and integration from multiple on-prem and cloud-based sources.
- Implemented job scheduling and automation for data transformation processes in Viya.
- Importing and exporting data from multiple sources (databases, cloud storage, flat files).
- Performing data profiling, cleaning, and transformation using SAS Data Studio.
- Creating and managing CAS libraries for distributed in-memory processing.
- Building data pipelines for scheduled data loads and ETL processes.

PROJECT - SAS TO SNOWFLAKE MIGRATION: ROLE - SENIOR TECH LEAD: ORGANIZATION : LTIMINDTREE (DATA & AI):

- Gathered detailed requirements from stakeholders on SAS Data Warehouse flows, job dependencies, metadata structures, and upstream/downstream impacts, improving requirement accuracy by 30% and reducing rework.
- Performed manual analysis of 500+ SAS codes and prepared comprehensive documentation covering logic, data flows, libraries, metadata, and connection details, accelerating migration readiness by 25%.
- Collaborated with stakeholders to refine scope, eliminate redundant logic, and de-scope unnecessary SAS components, reducing overall migration effort by 20%.
- Actively involved in SAS-to-Snowflake conversion using in house application **Polarised** migration accelerator, performing manual interventions for complex transformations and achieving 85–90% automation efficiency.
- Executed unit testing for both SAS and converted Snowflake SQL code, ensuring functional correctness and eliminating 95% of potential defects before integration testing.
- Performed detailed log analysis and resolved environment-related issues, leading to a 30% reduction in defect leakage during UAT and SIT phases.

PROJECT - DATA WAREHOUSE: ROLE - SENIOR ETL DEVELOPER: ORGANIZATION : IBM (DATA ADVISORY) :

- Collaborated with business stakeholders to gather requirements and design scalable data extraction, transformation, and loading (ETL) solutions, ensuring alignment with overall data architecture.
- Engineered end-to-end data pipelines using SAS DI Studio, building reusable components to generate datasets, views, and load structured data into DB2 and other downstream systems.
- Participated in the complete SDLC of ETL workflows, including development, functional testing, QA/UAT support, production deployment, and scheduling data pipelines for automated execution.
- Developed dynamic and parameterized macro-driven ETL frameworks, leveraging SAS Data Step, SQL, arrays, and user-written transformations to enhance pipeline performance and reduce code duplication.
- Integrated datasets from various structured and semi-structured sources—including delimited files, flat files, and relational databases—into unified SAS datasets following documented specifications.
- Worked extensively with ETL transformations such as Extract, File Reader/Writer, Joins, Split, Loader, SCD (Slowly Changing Dimensions) to design efficient, maintainable data engineering workflows.

PROJECT - SAS TO AWS MIGRATION: ROLE - SAS CONSUTANT: ORGANIZATION : YASH (DATA ANALYTICS) :

- Led the complete migration of PC SAS workloads to AWS SAS environment and migrated legacy SQL databases to Amazon Redshift, achieving 100% successful data migration and improving overall system scalability by 40%.
- Coordinated with stakeholders across multiple banking departments to collect, review, and standardize all SAS code assets required for cloud migration, reducing discovery and analysis time by 30%.
- Converted and optimized PC SAS code to AWS-compatible SAS scripts, automating repetitive conversion steps and achieving 95% conversion efficiency, while manually enhancing the remaining complex logic.
- Migrated all tables and views from legacy SQL databases to Amazon Redshift with zero data loss, performing automated table-level and row-level comparison scripts that improved validation speed by 50%.
- Scheduled and orchestrated AWS SAS jobs using Autosys, implementing performance monitoring and automated alerts that reduced job failures by 35% and improved pipeline efficiency by 25%.
- Tested outputs between legacy on-prem systems and AWS executions, developing automated reconciliation checks that detected 95% of mismatches before UAT/SIT cycles.

PROJECT - DATA WAREHOUSE SUPPORT: ROLE - SAS DEVELOPER: ORGANIZATION : CAPGEMINI (INSIGHT & DATA) :

- Worked as a core team member responsible for maintaining automated data summary pipelines, improving data accuracy by 30% and reducing manual result interpretation efforts by 40%.
- Handled debugging, defect resolution, and enhancement of SAS and SQL-based components, improving job stability and reducing recurring failures by 25% across critical workflows.
- Developed new SAS programs, SQL queries, and dynamic macro utilities to support complex data processing requirements, improving coding efficiency by 35% and accelerating delivery timelines.
- Analyzed multiple incoming data feeds from various source systems, performing validation and profiling activities that reduced data quality issues by 30%.
- Tracked development progress and resolved blockers during daily stand-up meetings, improving team velocity and reducing turnaround time for issue resolution by 25%.
- Identified SLA breaches caused by duplicates, delta mismatches, and missing values, reducing merchant exposure risks by 40% through enhanced validation logic and early alerts.

PROJECT - DATA LAKE: ROLE - SAS ETL CONSULTANT: ORGANIZATION : CAPGEMINI (INSIGHT & DATA) :

- Work includes designing reporting framework, gathering business requirements, dealing with different stake holders for data extraction.
- Develop ETL Pipelines using SAS DI Studio to create SAS datasets, views and load data into oracle tables.
- Develop dynamic macro programs, arrays by SQL and with SAS data step programs in user written transformation to improve process efficiency and avoid code redundancy.
- Extensively performed Data Cleansing during the ETL's Extraction and Loading Phase by analysing the raw data and writing SAS Program and creating complex reusable Macros.
- Analysing the data coming from data sources and performing the Data validation, Data cleaning and Data manipulation by using PROC SQL and SAS functions.
- Extensively used SAS procedures such as PRINT, REPORT, TABULATE, FREQ, MEANS, SUMMARY, TRANSPOSE and Data _Null_ for producing ad-hoc and customized reports and external files.

PROJECT - DATA WAREHOUSE: ROLE - SAS CONSULTANT: ORGANIZATION : TATA CONSULTANCY (DATA ANALYTICS) :

- Imported datasets from secured, client-shared network locations into SAS environments for detailed analysis and downstream reporting as part of regular data ingestion workflows.
- Performed exploratory analysis on banking datasets to identify weekly and monthly customer spending trends, supporting business insights and operational reporting.
- Analysed incoming data extracts, performing comprehensive data validation, cleansing, profiling, and transformation using PROC SQL, SAS Data Step techniques, and SAS functions to ensure data quality.
- Conducted customer risk analysis to identify payment defaulters; generated scheduled reports in multiple formats including HTML, Excel, PDF, and RTF, adhering to client reporting standards.
- Extensively utilized SAS procedures such as PROC IMPORT, EXPORT, SQL, SORT, FREQ, MEANS, COPY, TRANSPOSE, and RANK to support data ingestion, transformation, and analytical workflows.
- Leveraged PROC FORMAT and SAS Enterprise Guide (EG) to query, join, reshape, and enhance datasets for business-ready presentation.
